DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication

in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 15 and 18-25 are rejected under 35 U.S.C. 102(a) as being anticipated by Jones et

al..

Jones et al. disclose a method of sorting a plurality of items by destination in a robotic

system comprising the steps of defining a number of locations 12 in a robotic cell where each

location is a position for a container; creating a scheme of destinations by using a control system

16; reading a destination code (zip code) from each items (column 4, lines 15-23); and

determining whether the destination code is assigned a location. If the destination code is

assigned a location, loading the item in a container at the assigned location by using receptacles 4

and a conveyor 6. If the destination code is not assigned a location, determining whether to

assign the destination code a location based on whether the destination code is in a scheme of

destinations and the projected or historical number of items having the same destination code

(abstract, lines 7-15).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness

rejections set forth in this Office action:

Application/Control Number: 09/760,958

Art Unit: 3653

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 5. Claims 1-14, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones et al. in view of Okada et al..

Jones et al. have been discussed in paragraph 2 above and a system performs the same method in paragraph 2. However, Jones et al. do not have a speed of loading rating.

Okada et al. disclose a method and a system of sorting a plurality of items by destination comprising a plurality of locations 16, 17 and 18; reading 13 a destination code from each items; and assigning each location a speed of loading rating 15 and 30 which represents the time needed to move from a position detector 15 to the locations 16, 17 and 18.

Application/Control Number: 09/760,958

Art Unit: 3653

It would have been obvious to one skill in the art to modify the method and a system of Jones et al. to have a speed of loading rating as taught by Okada et al. to prevent the items being inadvertently diverted to incorrect locations (Okada et al., column 3, lines 30-60).

6. Applicant's arguments filed on September 03, 2002 have been fully considered but they are not persuasive.

Responding to applicant's remarks, applicant has alleged that Jones et al. do not disclose a plurality of locations in a robotic cell. However, the Examiner respectfully disagrees. As broadly claimed, the claim language does not recite what the function of the robotic cell is. Therefore, the claims are either anticipated by Jones et al. or obvious by Jones et al.-Okada et al..

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
